4	153	<i>Nature Reviews Materials</i>	
586	0	<i>Nature Plants</i>	Launched 2015
9	148	<i>Nature Reviews Disease Primers</i>	

### New in 2020

*Nature Cancer* publishes cancer-related original research, news and comment across the spectrum of the natural, applied and social sciences, from basic preclinical studies to translational and clinical work.

*Nature Food* is a thematic journal covering the natural, social, and applied sciences. The scope is broad and interdisciplinary, bringing together research from a wide range of communities such as food production and distribution, food economics, ethics and policy, and food science and human nutrition.

*Nature Reviews Earth and Environment* publishes authoritative and accessible reviews on geoscience, environmental sciences, climate change and sustainability. Given human interactions with the Earth and environment, societal implications – be it from a sustainability, policy, or economic perspective – will also be featured.

\*Data from interactions 01/01/19 - 31/12/19.
